

Welcome to the February newsletter from SKIPPER Electronics AS.

New retrofit plate for DL850/GDS101/GDS102 and EML224 Graphic:

DL850 was obsolete in December 2020. GDS101 and GDS102 will be obsolete in March 2021, and finally the EML224 Graphic will be obsolete in the end of June 2021.

All these displays are equal in size, so we have therefore developed a retrofit plate in order to fit the new touch display to the same cut out dimensions. This will make the retrofit for all these old graphics displays easier. We have even made it possible to fit the JB70 electronics on the backside of this retrofit plate.

The part number is:

KIT-RETROPLATE-001 Plate with mounting kit for retrofit SKIPPER Multi touch display in hole of old SKIPPER display

Training Courses in 2020

We are sorry to inform that due to the uncertain situation with the COVID-19, we have decided to cancel the SKIPPER technical trainings.

New dates for the training courses will be announced as soon as the situation has normalised.

We are planning new interactive web courses. Please send an e-mail with the courses you are interested in

to service@skipper.no. If you have any questions regarding training courses contact: support@skipper.no.

COVID 19 delays

Due to Covid we now experience delivery delay from some of our suppliers. This may influence the delivery performance from SKIPPER onwards. We are sorry for the inconvenience this may cause!

We do also experience increase in freight cost throughout the market!

Best regards,

Sigurd H. Paulsen
