

SKIPPER Newsletter

March 2021

Hi Sigurd

Welcome to March Newsletter from SKIPPER Electronics!

New online catalogue available!

The SKIPPER catalogue is now online. All SKIPPER products are presented in the new catalogue. The catalogue also includes all different setups for both Echo Sounders and Speed Logs. Please also pay attention to the Retrofit setup for Speed Logs.

[Please enter the latest digital catalogue here!](#)

SKIPPER DL2 Speed Log

SKIPPER DL2 is a dual axis doppler speed log providing you Speed Through Water (STW) and Speed Over Ground (SOG) in two or three axis (Docking Mode). The resultant sea current will also be calculated in speed and direction.

The SKIPPER DL2 is designed to be able to retrofit the following speed logs:

- Atlas Dolog 2x
- Sperry SRD 421 and SRD 500
- SKIPPER DL850 540 kHz
- SKIPPER DL850 270 kHz

Send your RFQ to sales@skipper.no.

SKIPPER GDS101 and GDS102

31. March is your last chance to order GDS101 and GDS102 Echo Sounders. These are now replaced by ESN100 and ESN200, both of which are proving popular to our customers. The GDS series has been a reliable workhorse within the industry, and our intention is that the ESN series will have the same role now and in the future!

[For more information regarding SKIPPER ESN100 and ESN200 click here!](#)

IMPORTANT! The GDS series will not be updated with the new IEC62924 Alarm standard and cannot be approved after 21. August 2021 for new installations. If you are not going to meet that deadline, contact us for an equivalent solution. All other products will meet the standard (including DL850)

Training courses in 2021

We are sorry to inform that due to the uncertain situation with the COVID-19, we have decided to cancel the SKIPPER technical trainings.

New dates for the training courses will be announced as soon as the situation has normalised.

We are planning new interactive web courses. Please send an e-mail with the courses you are interested in to service@skipper.no. If you have any questions regarding training courses contact: support@skipper.no.

Covid 19 delays

Due to Covid we now experience delivery delay from some of our suppliers. This may influence the delivery performance from SKIPPER onwards. We are sorry for the inconvenience this may cause!

We do also experience increase in freight cost throughout the market!
